DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 4-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: With respect to independent claim 1, the instant invention is directed to a method for receiving files sent by a central server to an audiovisual data reproduction system managed by operating system and linked to the server using a data transfer link. The relevant prior art of record, such as **Nathan et al (6,308,204)** disclose method of communications for an intelligent digital audiovisual playback system. **Radha et al (6,629,318)** disclose decoder buffer for streaming video receiver and method of operation. **Ellis et al (6,928,653)** disclose interactive electronic TV program guide with database configurability. **Inamoto (6,049,891)** discloses data access control system and computer-readable medium storing data access control program. **Arsenault et al (6,728,966)** disclose EPG guide naming system and method. However, neither **Nathan, Radha, Ellis, Inamoto** nor **Arsenault** and any of the cited references teach, suggest, alone or in combination the feature of "...for each file received, searching for a reception function to be associated with each received file based at least in part on the information representative of the type of data associated with the file, and processing each received file by corresponding reception function, the processing comprising copying the received file to a second storage means to update a database of the audiovisual reproduction system according to the data included in the received file..." as recited in combination with other features of independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wengelski et al (5,159,678) disclose method for efficient non-virtual main memory management.
